HEALTH & SAFETY DATA SHEET

De-ionised water or demineralised water

De-ionised water is not hazardous, but it must not be taken internally for human or animal consumption, or in any way used in products manufactured for human or animal consumption.

SPECIFICATION SHEET

De-ionised water or de-mineralised water: material

Clear colourless and odourless liquid.

Molecular Formula: H₂O

Molecular Formula: 18

Conductivity: 4 to 10 micro Siemens
 (10 micro Siemens max)

pH : 5 to 7.5

Insoluble impurities: 10.0 ppm max

Chlorides: Less than 1ppm

Fluorides: Less than 0.1ppm

Total solids: Less than 2ppm

PLEASE NOTE: De-ionised water should not be stored in direct sunlight.
